

matters+

mission control for in-house lawyers

Designed by lawyers for lawyers, to be the
centre of your legal operations ecosystem.

Intuitive, simple to use and powerful,
matters+ will revolutionize the way you work.

Introducing matters+

Legal Tech Ecosystem

matters+ provides a simplified approach to legal tech. It will future-proof your legal operations and provide you with the tools and information you need to operate a best-in-class, 21st century legal function.

matters+ has been developed to integrate easily with your existing technology and 3rd party software applications. It works seamlessly alongside Microsoft Office (including Outlook) and Google G Suite applications, so it won't require you to change fundamentally the way in which your lawyers work.

matters+ is the safe option to operate at the heart of your legal team.

Legal Hub

matters+ is the hub of your legal operations. It's the tool you and your lawyers use every day to manage the thousands of matters passing through your department each year.

It automates the interactions between your team and internal clients and produces rich data analytics on value delivered and team performance.

It's the place from which you easily access your templates, know-how and all the other legal apps and software applications your team uses every day, including the incredible 'plug and play' Cia (Contract: intelligent analysis) artificial intelligence contract review & mark-up tool.

Key features

Easy

- out of the box SaaS solution
- accessed via secure web browser
- available across all platforms

Automated

- automated matter creation / tracking
- Outlook integration with auto email and document filing
- automatic email notifications

Analytical

- auto-track every matter to produce rich, interactive analytics
- manage law firm relationships more effectively by tracking spend
- 'rate my advisor' tool for better insight on performance

The Agile Corporate Memory

- supports agile working practices and provides a 'single source of the truth'
- drives collaboration both internally and with your external advisors
- prevents knowledge leakage by maintaining a fully searchable database

Document Repository

- direct document storage or integration with 3rd party DMS
- final contract storage with data capture for valuable MI on key risks
- flag key dates for proactive contract management

Efficiency Tools

- trackers to highlight inefficiencies in the contracting process
- chess clock ticker to spot deal blockages
- optional time recording function by matter
- easily assign and reallocate work using capacity management tools

Knowledgebase

- dedicated collaboration space to store and access templates and know-how
- RSS news feeds from your trusted sources
- team chat forum to share knowledge and team news

Cia (Contract: Intelligent Analysis)

- 'plug and play app' contract review/mark-ups using the best artificial intelligence
- flag key risks and corrective actions automatically into your agreements
- average time savings of 4 - 6 hours per contract!

Data-Secure

- data securely hosted in the UK with AWS
- ISO27001 accredited

Integrations

matters+ has been built to work collaboratively and seamlessly alongside your other trusted software applications. As well as Microsoft and Google, matters+ has custom integrations to support third party apps including:

Our industry-leading developers can also make custom integrations so that your user experience is effortless and intuitive, with your favorite apps available from a single platform.

Our Clients

We are proud to work with some of the world's leading companies and most trusted brands:
